

Lift Design

Lift cabin LC Classic

LC Classic

Basic lift cabin with basic equipment

Floor

Floor is made of a lightweight fully galvanized steel sandwich.

Floor covering

PVC covering **ALTRO** in different colour variants. This material is made of softened vinyl, aluminium oxide and silicon carbide grains, polyester-cellulose layer and glass fibre grid.

Walls

Walls are made of **PLALAM**, which is galvanized steel sheet with PVC surface on the top (and protective film). Our standard colour sample includes 5 colours.

Front entrance portals and rear corner parts (bevelled at an angle of 45°) are made of PLALAM F12PPS – silver colour (stainless steel imitation)

Floor kick plates are made of brushed stainless steel K400. They are 100 mm high and perforated to ensure lift cabin ventilation.

Information panel in a stainless-steel frame

Lighting

Ceiling lightning (LED)

- a) Nebbia - Standard type of ceiling lightning. Silver edges (Plalam F12PPS)
- b) Pattern – you can also have ceiling with a pattern (see page 5)

All types of ceiling lightning have **LED** lights with diffuser and cooler for long life.

Handrail

Round stainless-steel handrail (diameter 42 mm)

Cabin operator panel

The operating panel is embedded in a flush-fitting hinged panel made of the material:

- a) PLALAM **F12PPS** – silver surface

Car pushbuttons

Lift cabin operator panel is composed of black polycarbonate glass with display, intercom system and pushbuttons (see page 3).

Whole panel is in a Plalam plate (silver colour F12 PPS)

Display- Black and white LCD 609 display

Landing pushbuttons

Landing pushbuttons – black panel with pushbutton and display.

On the display you can see what lift does at the time, if it goes up or down.

Others possible additions

Seat for people with disabilities or when you are just tired and want to sit down

Mirror 600 x 900mm with sandblasted details

Ventilation module under the ceiling

Information system in car is made of stainless steel (st.)

Car doors

- a) Automatic car door - Stainless steel (mirror or brushed) or RAL colours
- b) Semiautomatic door – RAL colours
